

# PRO-PLAN CHART NO. 31.

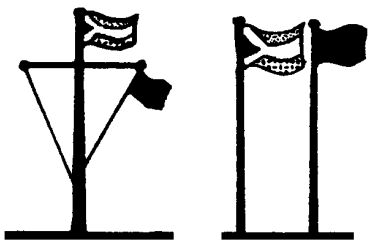

## SOUTH AFRICAN FLAG - first flown on 27 April 1994

### Sizes and widths

- o The width to height ratio of the flag is 5 : 3
- o The red and blue bands are one third of the height of the flag.
- o The arms of the Y meet exactly in the middle of the flag
- o The white and gold stripes are one fifth of the width of the red and blue bands.

When flown with other flags, the national flag should be flown highest or on the right.

If flags from other countries are flown, all should be at the same height.
